

# The Children's Home of Cincinnati & Linden Grove School

## **A Natural Partnership:**

The Children's Home of Cincinnati and Linden Grove School have partnered to provide a comprehensive education and life skills program for high school students diagnosed with Autism spectrum disorders.

Linden Grove's success integrating academics, social skills, and therapies is a natural fit with The Children's Home's expertise in educating and treating children with significant social and learning challenges. Together, we will provide high school students and their families with reliable resources that guide adolescents towards academic and life success!

## **Program Features:**

The new school will serve students in grades 9-12, will provide the same high quality, individualized education as Linden Grove's K-8 school, and is an approved Ohio Autism Scholarship Provider.

In addition, the school will feature Life Skills and Job Readiness programming to help older students prepare to be independent and productive young adults.

The school will be located on the beautiful, 40-acre campus of The Children's Home at 5050 Madison Road. A building is being specially designed and constructed to meet the unique needs of students with significant language processing, social skills, and sensory integration needs.

In addition to individualized education, high school students will benefit from specialized programming, including (but not limited to):

- Music Therapy
- Speech/Language and Occupational Therapy
- Social and Life Skills
- Specialized Academic Programming
- Art Education
- Physical Education/ Taekwondo
- Job Readiness
- Small student/teacher ratios

Interested students and their families are invited to schedule a time to tour the new facility, observe a Linden Grove classroom, and speak with our expert staff.
